

Low Code/No Code Decision Tree

While ministries manage many of their own low-code/no-code (LC/NC) applications, the Information Technology Division (ITD) provides centralized support for Microsoft Power Platform solutions that:

- Are public-facing or cross-ministry;
- Involve external agencies or sensitive data; and
- Run critical business processes.

The Low Code/No Code Decision Tree below can help you assess whether your existing applications require ITD support or if they can be supported by the ministry. Ministries may also choose to have ITD manage their applications even when support is not required.

For questions on the new service please contact the Power Platform team at: SBPITPowerPlatformSupport@gov.sk.ca.

LC/NC Decision Tree
