The following posting is in accordance with the clauses dealing with "In-Hiring Rate of Pay".

Permanent Full-time

AGR000939 - Agri-Environmental Specialist

Ministry: Executive Government>001 Agriculture

Grade and Job: SGEU.12., CAG - SGEU

Salary Range: \$44.410-\$55.654

Rate Approved: \$44.526

Key Responsibilities of position:

Agri-Environmental Specialist As an Agri-Environmental Specialist, you will develop and deliver extension events and provide in-depth knowledge to farmers, ranchers, agri-business, industry stakeholders, and Indigenous communities on best management practices to address agri-environmental issues and the availability of programming by: identifying client issues and providing insight to assist in the development of programming that supports the sustainability of client operations and the agricultural sector; assisting clients in addressing agri-environmental issues and providing support to solve production-related problems; building and maintaining effective working relationships with clients, colleagues and industry partners, based on mutual trust and respect; and effectively interpreting and communicating technical and program information related agricultural best management practices, research and available programming to a variety of audiences. The ideal candidate will be an experienced professional agrologist who has knowledge of current agriculture trends and issues in Saskatchewan and Canada. The candidate will have understanding of relevant environmental issues currently impacting the agriculture industry, as well as technical knowledge of native range, tame forage and riparian management fundamentals. The ideal candidate is someone who is: a leader in the delivery of client services focused on environmental programming, adoption of best management practices, building public trust, and technology transfer; organized and able to prioritize and meet multiple deadlines; able to work independently but also as part of a highly dynamic team of specialists; and able to plan, coordinate and facilitate meetings, events, field days and demonstrations to share information with clients to create a greater understanding of issues currently impacting the industry. Typically, the knowledge and abilities required for this position would be obtained through a Bachelor of Science degree in Agriculture combined with relevant leadership, program delivery and client service experience. Candidates must have the ability to be registered with the Saskatchewan Institute of Agrologists as defined by The Agrologists Act. A valid class 5 driver's license is required.

Qualifications of person Appointed:
