Purpose

The purpose of this policy is to ensure proper recognition, management, and communication of security events and

weaknesses through a formal process.

Scope

This Operations Security Policy applies to all business processes and data, information systems, components, personnel, and physical areas of the Government of Saskatchewan. Person(s) this policy applies to include but are not limited to:

- All employees, whether employed on a full-time or part-time basis by the Government of Saskatchewan
- Contractors and Service Providers that access and manage Government of Saskatchewan assets.

Policy Statements

- Incident management responsibilities and procedures must be established to ensure timely response to security incidents.
- An incident response team must be established to handle the intake, communication, and remediation of security incidents. IT staff taking on the role of responding to incidents when required will be referred to as "incident responders"
 - Incident responders must provide primary and secondary contact information so that they can be reached in the event of a relevant security incident.
 - Incident responders will establish a method of communication alternative to the primary method that is to be used if the primary communication method is affected by or is otherwise unavailable during, the security incident [e.g., alternate non-organizational email or instant messaging platform].
 - Communication with affected parties will be provided on an as-needed basis, until the incident is contained. It is up to the discretion of the incident responders to withhold information if the disclosure of said information deems a reasonable risk to The Government of Saskatchewan's security while the response is ongoing.
- The incidents must be documented and tracked as per a defined plan and addresses the seven stages of incident response:
 - Preparation
 - o Detections
 - o Analysis
 - o Containment
 - Eradication
 - Recovery
 - Post-Incident Activity
- Information security events must be reported through proper channels. Incidents must be tracked as the occur in a secure enterprise grade platform.
 - Any weaknesses suspected or verified in systems and services must be reported by users (employees or third-party contractors) using those systems and services. Users should immediately contact the IT service desk

Information Technology Division, Cyber Security and Risk Management Branch

- As information security events are assessed, determinations are made about whether they can be identified as
 information security incidents. Once an event is deemed a true security incident, the incident will be classified
 based on impact to the Government of Saskatchewan and relevant incident responders will be notified.
- Incidents will be addressed with the appropriate incident response procedures
 - Incident response procedures will be reviewed on annual basis. Any required updates will be communicated to the appropriate parties.
- Definitions and procedures around the identification, collection, acquisition, and preservation of evidence will be established.
 - o This data will be recorded and stored in a repository dedicated to Incident Management
 - The records of this data will be audited regularly and timestamped.
- In the event of a major incident, only a designated spokesperson or department will address the media.
- After all relevant security incidents, a post-incident review will be conducted by incident responders to
 determine the root cause of the incident, the consequences, and the lessons learned. The information gained
 from responding to and resolving incidents will be used to reduce potential future incidents. Any affected
 parties, including end-users, may be contacted for additional insight.

Supporting Internal Resources

| Resource | Description |
|---|--|
| Internal Security Governance Policy | All Government of Saskatchewan Security Policies align to this Governance Policy |
| Information Protection Security Controls (IPSC) for Classified Data | This document defines the required access controls required to provide the proper security based on Classified Data for Government of Saskatchewan |
| GoS Incident Response Plan | Documented procedures, contact information and playbooks. |

A breach of this policy may lead to discipline, up to and including termination, in accordance with PS 803 Corrective Discipline policy. Similarly, for contracted resources or entities, Government of Saskatchewan will initiate corrective measures up to and including restricting access to services or initiating disciplinary action up to and including termination of a contract or agreement with the contractor, vendor, or agent.

Exceptions

In cases where it is determined that a breach or violation of Government of Saskatchewan Information Security policies has occurred, the respective Ministry under the direction of the Chief Information Officer and Information Security Branch, will initiate corrective measures including restricting access to services or initiating disciplinary action up to and including dismissal, in accordance with PS 803 Corrective Discipline policy, or in the case of contractors, vendors, or agents, the termination of a contract or agreement with the contractor, vendor, or agent.
