

You can help protect government's IT environment.

Learn about malware and viruses.

The IT division performs regular virus scans on all devices.

Only download software from sites that you have heard of and trust.

Do not open suspicious emails or click on attachments.

Avoid clicking on pop-up windows while browsing the Internet.

Browser security settings should be set high enough to detect automatic or unauthorized downloads.

If you notice your computer is slowing down, crashing or acting unusual, stop using it and contact an IT professional.

IT security questions? Contact the IT Service Desk by phone at 306-787-5000 or by email at itoservicedesk@gov.sk.ca.
