National Safety Code Program

Central Vehicle Agency, Ministry of Central Services

National Safety Code (NSC) Program in Saskatchewan

The National Safety Code (NSC) Program in Saskatchewan regulates the operation of heavy trucks and trailers across the province. Any truck and trailer with a combined or individual Gross Vehicle Weight over 11,793 kg must follow NSC standards.

It is of utmost importance that all vehicle operators adhere to NSC protocols. The NSC program is in place to improve highway safety. Any vehicle operators that tow a trailer are encouraged to review the documents listed below for more information.
