

# SharePoint Online Roll Out Schedule

Last revised: April 2021  
Last reviewed: April 2021

Ministry of SaskBuilds and Procurement

The document below lists the SharePoint Online roll out dates as part of the overall Microsoft Office 365 project.

SharePoint Online is bringing existing and new SharePoint sites to the cloud for ministry branches based on readiness and demand. While this won't always happen ministry by ministry, a number of ministries do wish to do this in a coordinated way.

The schedule for the next phases is still being determined. New transition dates for ministries and branches will be added regularly.

SharePoint Online offers intranet and team collaboration sites that you can access from any device, anywhere — including from a mobile device.
